

## Arrows Academy French I Summer Work

1. Go to [languageguide.org](http://languageguide.org). Under the “nombres” section, listen to numbers 1-20. Return to the site multiple times over several days until you have truly mastered counting to 20, and then work on counting to 39.

2. On a desktop or laptop computer, not on a mobile device, create a duolingo account and use the code UAQPQA to link it to your Arrows classroom. Please be aware that the mobile app does not communicate with teacher accounts consistently.

3. After joining the classroom, complete the “Basics 1” assignment. It will take you about 45 minutes, but you don’t have to do it all at once. Your progress will be saved.

4. Go to [quizlet.com](http://quizlet.com) and create a quizlet account if you do not already have one. Use this link to join the French I class:

<https://quizlet.com/join/6ePRVCF22>. Also email me at [summer.osborn@arrowsacademyga.org](mailto:summer.osborn@arrowsacademyga.org) to tell me your quizlet username.

5. After connecting your quizlet account with mine, and after learning numbers through 39, complete this quizlet activity:

<https://quizlet.com/4vpx9c>

6. Around August 1st you will receive an email from me. Notify me if you do not receive it. The email will include:

- Instructions for how to set up your grammar notebook (using the composition notebook listed on your buying guide)
- Links for videos for learning basics of French pronunciation
- Information about how to study for a foreign language
- A link to an online form to fill out prior to the first day of school.
